

Jerusalem Girma

Software Engineering Student | Full Stack Developer

✉ laviee1434@gmail.com ☎ +251978642454 📍 Addis Ababa, Ethiopia 🔗 LinkedIn 🐙 GitHub

PROFILE

Motivated Software Engineering student and Full Stack Developer with strong foundations in web development, problem-solving, and software design. Experienced in building responsive and user-friendly applications using modern technologies. Passionate about continuous learning, teamwork, and delivering practical software solutions with real-world impact.

SKILLS

Programming language

Python, JavaScript, Java, C++

Web & Frameworks

React, Next.js, Node.js, HTML, CSS, Tailwind CSS

Tools & Platforms

GitHub, MongoDB, Postman, VS Code, Vercel

Soft Skills

Problem Solving, Teamwork, Adaptability, Time Management, Quick Learner

PROJECTS

Campus Posts Portal,

Tech Stack: Typescript, Next.js, Node.js, Express, MongoDB, Tailwind CSS

- Developed a web-based portal for campus users to create, view, and manage posts
- Implemented user authentication and role-based access for students and administrators
- Built a responsive and intuitive interface using modern frontend technologies
- Integrated backend APIs for data storage, retrieval, and secure operations

Socket Quiz App

Tech Stack: Java (JDK 8+), Socket & ServerSocket, Swing (JFrame, JPanel, JLabel, JButton, JRadioButton), Multithreading, Collections (HashSet), javax.swing.Timer

- Developed a client-server based quiz application using Java sockets for real-time communication
- Implemented a desktop GUI using Swing components for interactive quiz participation
- Utilized multithreading to handle concurrent client connections efficiently
- Managed user attempts and quiz logic using Java Collections

ASTU_MSJ Library Management System

Tech Stack: React, Node.js, Express, MongoDB, JWT, Tailwind CSS, Jotai

- Built a full-stack web application for managing a digital library
- Implemented secure authentication with role-based access
- Developed responsive UI and integrated backend APIs
- Managed data using MongoDB and RESTful services

Movie Recommendation App

Tech stack: React, HTML, CSS, JavaScript Tailwind CSS

- Built a movie recommendation application that allows users to browse and discover movies
- Integrated a third-party movie API to fetch real-time movie data and details
- Implemented search and filtering features to improve user experience
- Designed a responsive and user-friendly interface using modern frontend technologies

EDUCATION

B.Sc. in Software Engineering - Adama Science and Technology

Focused on software development, algorithms, data structures, and system design through hands-on academic and team projects.

present – 07/2028
Adama, Ethiopia

★ TRAINING & PROGRAMS

Intensive Software Engineering Program

- Full-stack web development and algorithmic problem-solving
- Built real-world projects individually and in teams

5 Million Coders Program — Trainee

- Learned core programming concepts and modern software development practice
- Built hands-on projects to strengthen problem-solving and practical coding skills

Data Analysis Fundamentals - Trainee

- Learned data collection, cleaning, and basic analysis techniques
- Applied concepts through practical, project-based exercises

🏠 ORGANISATIONS & ACTIVITIES

ASTU MSJ Summer Bootcamp — Participant

📄 CERTIFICATES

- | | | |
|---|--|---|
| • Programming Fundamentals Certificate — Core programming concepts and problem-solving skills | • ASTU_MSJ Summer Bootcamp Certificate — Intensive training in programming and collaborative problem-solving | • Data Analysis Fundamentals Certificate — Data collection, cleaning, and basic analysis techniques |
|---|--|---|
